

Creative Arts Art: Whole School Long Term Plan

We believe that creating art is a fine way for children to make choices and solve problems. Every step involves making a decision: what colour to use, how to make a line, what medium to choose. With every choice the object becomes more and more their own.

Everyone has an imagination. Art takes it a step further. Through art, children create something that, until that point, was only imagined. Thus, they create visual manifestations of abstract ideas.
